

## Minutes of Monthly Meeting M.D. Battle River No. 423

### Many Appeals Dealt With.

The Council of the M. D. of Battle River No. 423 met in the office of the said District on Thursday, Aug. 11. Full council present, Reeve R.D. Smallwood in the chair.

Moved by Mr. Dalton that minutes of July 14 be approved as read. Crd.

Moved by Mr. Blakeley that relief be extended to J. Baska for \$5 until Sept. 8, 1938. Crd.

Moved by Mr. Smallwood that Sec'y write Dept. of Child Welfare re Albert Walker sending full particulars of this matter and request an inspection from that Dept. make an inspection of this case if found necessary and to proceed under the Child Welfare Act. Crd.

Moved by Mr. Stewart that the report of Mr. Smallwood re leasing of N.W. 7-44-9 v. 4th for three years for the total amount of current taxes each year to Geo. Clapp of Hardisty be accepted. Crd.

Moved by Mr. Collette that report of Reeve and Sec'y re Vermilion conference be accepted. Crd.

Moved by Mr. Blakeley that report of Reeve and Sec'y re F.C.A. Act be accepted. Crd.

Moved by Mr. Stewart that this council lease to Geo. Clapp of Hardisty the N.W. 7-44-9 for a term of three years as from this date for the amount of the current taxes each year, 30 days notice in case of sale. No fences, fixtures or other improvements shall be removed from said land without consent of the Mun. Dist. concerned, but any improvements placed on said land by the lessee shall be removed by him on 30 days notice. Crd.

Moved by Mr. Smallwood that relief be extended to Mrs. J. Bergquist for \$13 until Sept. 8. Crd.

Moved by Mr. Blakeley that report of Reeve and Sec'y re J. Baska hospitalization and medical and information received by Dr. Greenberg, be accepted. Crd.

Moved by Mr. Collette that the inspector's report of the inspection of the records of the Mun. Dist. dated July 1, 1938, be accepted as read and that the Reeve acknowledge receipt of same and its disposition. Crd.

Moved by Mr. Steele that Sec'y write H.D. Mann & Co., Calgary, re N.W. 22-45-7, that their letter of July 28 has been considered by the council and that any proceeds from their lease will be applied on taxes if the said proceeds are not sufficient to redeem this land under the Tax Recovery Act same will be leased in 1939 under the same conditions. Crd.

Moved by Mr. Collette that report of Reeve and Sec'y re Mrs. Bruluit direct relief be accepted. Crd.

Moved by Mr. Steele that Tax Consolidations of N.W. & N.E. 32-45-8 be approved. Crd.

Moved by Mr. Dalton that this council sell to G. Ledue of Fabian the S.E. 23-45-7 for the sum of \$350 cash, subject to the approval of the Minister of Mun. Affairs, and subject to passing of bylaw No. 59. Crd.

Bylaw No. 59, a bylaw of the M.D. of Battle River No. 423, concerning the sale of the S.E. 23-45-7 pursuant to the provisions of the Tax Recovery Act 1938, presented.

Moved by Mr. Stewart that Bylaw No. 59 pass its first reading. Crd.

Moved by Mr. Dalton that Bylaw No. 59 pass its second reading. Crd.

Secretary was instructed to forward the necessary Minister's approval forms and copy of Bylaw No. 59 to the Dept. of Mun. Affairs for approval.

.....

Court of Appeal re Wild Land Tax Act 1938 open.

Appeal of the Can. Pacific Railway laid on the table for consideration, and the following lands were dealt with:

Moved by Mr. Steele that the appeal against the E. 2-17-44-8 be held over for Mr. Blakeley to investigate and report at Sept. meeting. Crd.

Moved by Mr. Blakeley that appeal against E. 2-17-44-8 be disallowed. Crd.

Moved by Mr. Blakeley that appeal against N. 1-44-9 be disallowed. Crd.

Moved by Mr. Smallwood that appeal against N.E. 1-44-9 be allowed on account of crop lease. Crd.

Moved by Mr. Smallwood that appeal against N.W. & S. 1-44-9 be disallowed. Crd.

Moved by Mr. Smallwood that appeal against S. 1-44-9 be allowed on account of grazing lease. Crd.

Moved by Mr. Smallwood that appeal against S.E. 3-45-9 be disallowed. Crd.

Moved by Mr. Blakeley that appeal against S.W. 38-44-9 be held over for Mr. Smallwood to investigate and report at Sept. meeting. Crd.

Moved by Mr. Blakeley that the appeal against S.E. 3-45-9 be held over for Mr. Smallwood to investigate and report at Sept. meeting. Crd.

Moved by Mr. Smallwood that appeal against N.E. 19-45-9 be disallowed. Crd.

Moved by Mr. Stewart that appeal against N.E. 38-46-9 be allowed on

## Mrs. J. Fletcher and Son Of Irma. Injured In Highway Accident

On Thursday evening, August 11, Mrs. J. Fletcher and son Jackie of Irma were injured and son Jackie of Irma was killed in a head-on collision between two cars on the highway near Seattle. Mr. Wm. Horton, driver of the other car, was also quite badly hurt. Mr. Fletcher received word by long distance telephone Friday morning and left for Seattle as quickly as possible. A telegram was received from Mr. Fletcher last Monday saying Mrs. Fletcher and Jackie were improving.

## Wm. Bridgeman, Jarro District Pioneer, Passed Away August 10th

Jarro, Aug. 11th—Mr. William Bridgeman passed away in the Viking hospital on Wednesday, August 10th, at the age of 64 years. The late Mr. Bridgeman was born in Orillia, Ontario, November the 9th, 1874, and was united in marriage to Sarah Walker on June 15th, 1898. He came west in the year 1911 and settled in the Viking district. In 1914 he moved to the Battle district where he since resided, building for himself and family a beautiful home.

He leaves to mourn his loss his loving wife, two sons, Stanley and George, two daughters, Elsie at home and Mrs. Gladys Derrick, of Collins, California. The funeral service was held at the Bridgeman's home on Monday, August 15th, at two o'clock in the afternoon. Rev. R. W. Griffith officiated. Interment took place in the Jarro cemetery.

The pall bearers were Messrs. Jack Herrick, Geo. Therou, Ross Shippey, Claude Shippey, Howard Herrick and Hugh McGuire.

Many beautiful floral tributes were received from the following friends: Victory Lodge No. 112, A.F. & A.M.; Mr. and Mrs. W. A. Walker and Reg.; Mr. and Mrs. Geo. Walker; Nathaniel, Libby and Cecilia; Mr. and Mrs. C. B. Sarjant; Mr. and Mrs. Geo. Therou and family; the Jamieson family; Mr. and Mrs. Ross Shippey; the Lindberg family; the Boyd family; H. L. McGuire; Mr. and Mrs. C. Shippey and family; Mr. and Mrs. Gordon Holt and Margaret Whidden; Mr. Chas. Holt, Jonas, Gladys and family; the McNall family; Mr. and Mrs. J. J. Skaltz and Jack; Mr. and Mrs. Frank Williams; Mr. and Mrs. E. Williams; Mrs. Blain and boys; Earl, John and Donald Moore; Mr. and Mrs. A. R. Harper.

## BANK OF MONTREAL HAS SERVED WAINWRIGHT AND DISTRICT FOR THE PAST THIRTY YEARS

Wainwright, Aug. 19.—Observance next week of the 30th anniversary of the establishment of Wainwright's bank, the Bank of Montreal, recalls the earliest days in this section of Alberta.

When the bank first opened for business in Wainwright on August 21, 1908, the townsite had not yet been opened and what buildings there were—no more than six in number—were for the most part of the shack variety. What is now the centre of the town was then under the lake and the homesteads were scattered over the prairie. The Wainwright hotel, one of the few frame buildings, furnished the bank, which was then an office of the Merchants Bank of Canada, now for many years a part of the Bank of Montreal, with temporary quarters. Until the hotel received a license the banking was done in the bar-room and a locked trunk in a bedroom served as a safe. Purchasing two lots from the Grand Trunk Pacific Development Co. the bank shortly afterwards erected a small wooden office. Three years later, finding the accommodation too small for its rapidly growing business, the bank built a two-storey building at the corner of Main street and Second avenue. However, a few years ago these premises, like many others in the business section, were totally destroyed by fire, and the present quarters were erected.

Wainwright was on the threshold of the development which has seen it reach its present place of importance in the province, when the bank opened for business there a generation ago. Every day saw homesteaders arrive and when the railway was extended as far as the town in 1911 its growth was greatly accelerated. The people of Wainwright, a village which had sprung up a few miles south, moved to Wainwright and furthered this growth.

Today Wainwright, with a population of more than 1,000, with modern buildings and splendid educational and inspirational systems, demonstrates that the faith in its future held by the early settlers was more than justified. The centre of an important mixed farming and grain-growing district, the town has excellent prospects of contributing even more to the wealth of the province when the oil-bearing properties in the district are more fully developed.

Tourists also find Wainwright attractive, one of the features being its National Buffalo Park which contains the largest buffalo herd in the world.

In all the progress and development of the community during the last three decades the bank has been a potent factor, providing at all times the complete and up-to-date banking service of an institution that serves Canada from coast to coast.

The late H. G. Morrison or "Dutchy" as he was familiarly known, one of the ablest bankers in Alberta, opened the branch, and later managers were S. E. James, H. C. Munro, C. H. Rowe and John Cuthbertson. C. W. McBride, the present manager, replaced D. L. Plimpton in 1933.

**History of the Parent Bank**

It was on Nov. 3, 1817, when pioneer Canadians were doing practically all their business by barter, that the Bank of Montreal—the first permanent bank in British North America—opened its doors for business in a modest little rented office in St. Paul street, Montreal, with the formidable capital of \$350,000.

Trading in the Canadian colonies in the early 1800's was carried on under great handicaps, and it was, in fact, to ameliorate the exceedingly chaotic and primitive conditions under which the business men of that day had to conduct their financial affairs that the bank was established.

At the time Canada, of course, had no currency of its own. The colonies were far too poor to afford such a luxury, and not only American, British and French, but Spanish and Portuguese money was in circulation. Naturally, the ratios of exchange into colonial money of account were subject to frequent variations. As carried on principally by barter and international business was on a very unstable basis.

Founded by nine English and Scottish merchants of Montreal, the bank set about the business of giving some semblance of organization to the financial life of the country, and its first task was the issue of paper currency—that is, the bank's own bills in small denominations—and, later, copper coins. Specimens of this currency—which was in reality the first

## PETERSON'S GARAGE

E. W. PETERSON, Proprietor

We are now able to give your cars good mechanical service. Our mechanic is fully qualified to do so

Enarco Gasoline, Grease and Oil  
Gold Standard Distillates  
British Industries Twine  
Massey-Harris Repairs

See us about the new Pacemaker and Model 25 Tractors, Hammermills, One-way Discs, etc.

One 15-30 McCormick Deering Tractor in good shape  
A Few Second-hand Binders  
Some Good Values in Used Cars

## Mrs. and Mr. Farmer

NOW is the time to order that new RENFREW RANGE. The quality of the Renfrew is remembered long after the price is forgotten. If ranges were sold by the pound, you would find the Renfrew the cheapest in dollars and cents. If you haven't got the weight you haven't got the wear.

**POWER WASHERS**

I am now agent for the Climax Electric and Gasoline Washers. This washer has been built by an old Toronto firm for upwards of 20 years. It is not equalled for Utility, Beauty or Price. Call in and see this new model—enameled inside and out.

**V. Hutchinson - - - Irma**

## Vanishing Wealth

Whatever may be thought of their proposal that the administration of the natural resources of the country revert to the Dominion government, the statements of the Federation of Ontario Naturalists, in their brief to the Royal Commission on Dominion-provincial relations may well give pause for reflection and serious consideration.

Whether or not one agrees that the remedy for existing conditions lies in their principal recommendation, namely that of vesting the control of the resources in the Dominion government, the country at large owes a debt to the Federation for its timely note of alarm which was sounded when the organization drew to the Commission's attention, in no uncertain terms, the profligacy with which the resources are being dissipated for immediate gain with little or no thought for anything like commensurate measures to ensure their conservation or replacement.

One has only to read the brief to be strongly impressed with the necessity for sterner measures to ensure conservation of this great heritage if the present generation is not to be deprived of many of the advantages, economic and aesthetic, the ownership of such resources brings and if posterity is not to be entirely stripped.

### Startling Losses

That great wastage of a precious inheritance has not only been allowed in the past but is still being practiced to the detriment, present and future, of the entire country, is brought home with realistic force. The evidence is writ large on the pages of the brief and the statements cannot well be refuted.

Figures quoted indicate appalling losses to the country as a result of wasteful methods of agriculture and lumbering, resulting in depletion of water supply, seasonal floodings with resultant loss of moisture when most needed, followed by soil erosion supplemented by further losses to valuable stands of timber from forest fires.

The forest area burned in Canada during 1936 totalled over three million acres, or 4,500 square miles. When added to this is the large amount of timber which is being cut down annually for the lumbering industry, the pulpwood industry, for fuel and for other purposes with comparatively no provision for replacement, one may well wonder how much longer these valuable resources will continue to be available and what the effect such continued losses are going to have on the future revenue of the Dominion, on the welfare of that basic industry—agriculture and, in general, on the happiness and prosperity of the people.

### Impoverishing The Soil

"It should be remembered," very aptly says the Federation, "that repeated fires throughout large areas of Canada where the soil is thin cause its destruction and make the possibility of future crops of trees on such areas a remote one for hundreds of years to come; the enormous tracts of almost bare rock to be found in many parts of the Dominion are mute evidence of the washing or blowing away of such soil which took centuries to form and which once bore a forest of permanent revenue-producing possibilities."

Not only does the extravagant denudation of the forest resources result in a serious loss to agriculture through impoverishment of the soil, and the drying up of the water supply, but it also spells disappearance of other valuable resources and the dedication of industries upon which they are based. With forest coverage and food sources gone and running water depleted, the rapid disappearance of wild life such as the fur-bearing animals, once a source of great revenue; the wild fowl, a source of attraction for visiting and native sportsmen and the fish, also a great attraction for tourists and the basis of another of the country's industries, are but a matter of time, and for some of them, not a very long time.

"In recent years," again quoting the Federation's brief, "the plight of some of our wildlife has become desperate. This is especially true in the case of waterfowl which, depleted by overshooting, have been reduced to very low numbers through drought in their nesting grounds on the prairies. The Eskimo curlew, Labrador duck, passenger pigeon and great auk are now totally extinct, and fear for the continued existence of several species of wildfowl, for the muskox and the moose are widely expressed. It might also be pointed out that the chestnut, one of the most beautiful, useful and valuable trees is practically extinct in the United States and Canada and that the disappearance of the Douglas fir in 15 years and the white pine in 30 years is predicted by authorities."

### What Others Say

What authorities in other countries think of our profligacy and wasteful methods may be summarized in a statement made in 1923 by Professor Troup, head of the Imperial Forestry Institute at Oxford, England, who is well conversant with protective measures adopted in his own and other European countries, when he said:

"I was frankly amazed, as were many of my colleagues, at the extent to which the forest had been destroyed with little or no attempt at regeneration. Whoever may have been responsible for this state of affairs in the past, the Dominion and provincial governments must now, piled that they have not had fair warning as to what will happen if this policy continues. I am in full agreement as to the necessity for research into soil problems and silviculture in relation to logging practice to secure natural regeneration and sustained yield."

In the light of the statements made to the Royal Commission, the undisputed figures in support of the contentions made and the evidence of authorities, national and international, it would seem that something more ought to be done about it than is now being done.

### Saddest Man In Tokyo

#### Citizens Claim Admiral Okeda Has

#### Diagnosed The Emperor

Admiral Okeda, who was Prime Minister of Japan two years ago, is the saddest man in Tokyo to-day. In 1936 a group of Japanese, intent upon a coup d'état, entered Okeda's home and murdered the man they found there. Emperor Hirohito thereupon publicly lamented the Admiral's death. The next day the true story was unearthed—that Okeda had escaped assassination and that his brother-in-law was the one slain. Despite his good fortune, Admiral Okeda has lost caste with Japan's citizens, who insist that he should have committed hara-kari—because he had diagnosed the Emperor. . . . diagnosed him in returning to his thereby becoming living testimony to the fact that the Emperor had uttered an untruth in lamenting Okeda's death.

### Modern Alpine Hut

Constructed to keep out both heat and cold, a hut to shelter mountaineers at night has just been opened near Chamrousse, France. It will accommodate 20 people. Constructed of duralumin coated inside with asbestos and furnished with asbestos bedding, the hut is fireproof as well as temperature-proof.

At Oland, an isle off the coast of Sweden, may be seen prehistoric stone age remains. Huge rocks carved in the form of Viking ships replete with benches for the rowers.

### Death Of Old Timer

#### Mrs. Wright Was First White Child

#### Born On B.C. Mainland

The first white child born on the mainland of British Columbia is dead. Eighty years old, Mrs. Alice Rowbottom Wright, died after failing to recover from a heart attack suffered several months ago. It was in 1858 that Mrs. Wright was born at Sapperton, at the time a tiny settlement five miles east of New Westminster, B.C. Her birth occurred just two months after her parents arrived from England. Her father, George William Rowbottom, and mother came to British Columbia with Col. Moody and his Sappers. When she was 17 years old, she married John W. Wright and left for Leo La Hache where he kept an inn in the heart of the Cariboo gold country. In later years she was known to hundreds of prospectors for her kindness.

### Score Is Even

Ten years ago Chester E. Heal's automobile struck O. J. Scott at a street intersection in Gas City, Ind. Scott's leg was broken. A short time ago Scott's automobile struck Heal and knocked him off his bicycle. Heal's leg was broken.

Butterflies taste with their legs, which are 1,600 times as sensitive as the human tongue.

Since the year 1591, all the Popes of the Roman Catholic Church have been Italian.

## "TURN RIGHT TO OGDEN'S"

When you get going with this extra fragrant Fine Cut, you're on the straight road to true smoking pleasure. There are no stops or detours to enjoyment either—when you roll your own with Ogdens's, the cigarette tobacco that has everything a smoker could ask for. You'll make doubly sure of smoother, happier rolling if you always choose the best papers—Chanticles' or Vogue's.

### African Bushmen

#### Stone Age Men Would Use Poison Arrows To Obtain Food

Unless they are allowed to use poisoned arrows to shoot game, Africa's Stone Age men, the bushmen of the Kalahari desert, will die out from sheer starvation.

This is the contention of members of the bushmen preservation committee, on which the British government, the South African government, the Southwest African administration and the University of South Africa are represented. The committee was formed as a result of the interest created when a group of the "little brown people" went to Cape Town last year to pay homage at the coronation.

The trouble is that there is an international convention for the preservation of Africa's fauna and flora, one clause of which forbids the use of poison for hunting.

"If they are to be stopped from using poisoned arrows, then they must be provided with firearms if they are not to die of starvation, and to give them firearms would be extremely inadvisable," Senator Boydell, a member of the committee, declares.

Senator Boydell contends that the bushmen could not possibly use enough poison to make any real difference to the fauna of Africa, and hopes that the committee may be able to secure a special reserve for them, where they can live as they have done for 16,000 years.

### SELECTED RECIPES

#### "SPICED RELISH AND COLD MEAT PLATE"

6 cloves  
2 1/2 cups water  
1 package Lemon Jell-O  
1/4 teaspoon salt  
1 1/2 cups India relish  
1 teaspoon drained horseradish  
Boil cloves in water three minutes. Remove cloves. Dissolve Jell-O in one pint of this hot liquid. Add salt. Chill. When slightly thickened, fold in relish and horseradish. Turn into half-size individual molds. Chill until firm. Unmold and cut in cubes.

Serve 12.  
Prepare luncheon plate of sliced liverwurst or cold meat loaf, rye bread sandwiches or potato chips and a Jell-O mold, unmolded on crisp lettuce. Garnish plate with green pepper rings and stuffed olives.

#### CUCUMBER RELISH

1 package Lime Jell-O  
1 1/2 cups hot water  
1/4 cup vinegar  
1/4 teaspoon salt  
Dash of pepper  
1/4 teaspoon scraped onion  
2 cups drained, chopped cucumber  
Dissolve Jell-O in hot water. Add vinegar and 1/4 teaspoon salt. Chill. Add 1/4 teaspoon onion, pepper, and onion to cucumber. When Jell-O is slightly thickened, fold in cucumber mixture. Turn into half-size individual molds. Chill until firm. Unmold. Makes 12 half-sized molds.

### Shakespeare Up-To-Date

#### Television Audience Heard Original Words But Saw Modern Costumes

Shakespeare's Julius Caesar was televised in a version showing the men in lounge suits, uniforms and one blazer and white flannels.

The television audience in London saw felt hats, revolvers, gas masks, skyscrapers and dugouts, but heard the original words as the bard wrote them.

"Space a copper for a poor out-of-work."

"Here is a shilling—call at my shop to-morrow and I will find you work."

"No, sir, the shilling will be enough—I am not greedy."

## The Poultry Flock

### Maintain Sanitary Conditions In Order To Obtain Best Results

Hygiene and sanitation are factors as important to the poultry flock as good stock, clean water, proper feed and range, states W. T. Scott, Head Poultryman, Dominion Experimental Station, Harrow, Ont. Failure to maintain objective and sanitary surroundings is frequently the weak spot in poultry management. Cleanliness is essential, as high mortality and reduced egg production follow disease and impaired vitality. To ensure healthy surroundings remove droppings daily and scatter an absorbent such as sand plaster over the dropping boards. Renew litter before it becomes too dirty, and supply clean water in clean vessels; disease may spread rapidly through the medium of dirty water or containers.

At least once a year, with a hoe and broom, scrape and sweep clean the floors and walls of the poultry house, removing dust and cobwebs, and if running water is available use the hose at high pressure. Paint roosts and supports with a good coal tar disinfectant, full strength, and spray frequently with a solution of the same product according to the instructions of the manufacturer. The range also demands its share of precaution. Gravel or sandy loam provide the best sanitary conditions and is easily worked with a one-horse plough. All range and yards should be ploughed and cropped yearly and seeded with a quick-growing crop.

Sudan grass is palatable and greatly relished. To ensure a good supply, it is well to cut Sudan when about six inches high before allowing the birds access to the yards or range. Ideal sanitary conditions are supplied with a two or three year rotation: a hoed crop intervening in the three year rotation provides additional protection against parasites that flourish in contaminated soil.

### Strange Water Bag

#### Able To Make Starch And Fat In Huge Quantities

Discovery that one small, barely-visible water animal can make, in 26 days, more starch and fat than the whole United States could eat, was described at the Marine Biological Laboratory, summer workshop of United States scientists.

The animal is chilmonax, a flagellate, so termed from the fact that he swims by fashing with fine, hair-like arms called flagella. Scientists got interested in him because, unlike virtually all other living things, he is able to make starch and fat without light. Starch and fat are two of the three essential foods. Protein is the other.

The amount chilmonax can make, says Dr. S. O. Mast, of Johns Hopkins University, is theoretically prodigious.

"For example," Dr. Mast wrote in the Collecting Net, a scientific journal, "in one of our experiments, which was started with a single individual, and continued 26 days, if all the individuals had been kept cultured, there would have been at the end of the experiment enough to reach a total volume of 612,000,000,000 cubic metres. The starch in this mass would have been approximately 19,000,000,000 cubic metres and the fat 6,000,000,000 cubic metres. "This is sufficient to supply every individual in the United States with some 70 tons of starch and 20 tons of fat."

### Buddhist Monk

#### Treibtch-Lincoln Wants To Return To His Native Hungary

Hungarian authorities were reported weighing the demand for legal re-entry into his native Hungary of Ignatius Timothy Treibtsch-Lincoln, the one-time international agitator and spy and now a Buddhist monk called Chao Kung, "Light of the World."

Treibtsch-Lincoln, 60, wearing the simple habit of a Buddhist missionary, was somewhere in hiding.

An equally strange figure, calling herself Tao La, garbed in a Buddhist gown and leather sandals, brought him back to the memory of Hungarian passport officials in June by interfering in his behalf and asking if he might return to his native land.

He was tired from a life of adventure, she said, and wanted to spend the rest of his days in pious contemplation at the tomb of his ancestors.

Treibtsch-Lincoln in 1934 made a spectacular journey across Canada, accompanied by six nuns and four monks, all Buddhists. They had intended to establish a Buddhist monastery in Germany. But after sailing from Halifax, the party was refused permission to land in England and was returned to Canada.

Most fish that swim deep in ocean depths are red, but the pale light at that depth makes them appear gray.

## British Train Coming

### Coronation Scot Express Will Visit United States In January

The London Midland and Scottish Railway's Coronation Scot express train which will visit the United States will be shipped from England next January, it is announced.

The train, consisting of streamlined locomotive and eight coaches will enter the United States via Baltimore. On arrival the engine and train will be assembled in the Baltimore shops of the Baltimore and Ohio Railroad.

Before going on exhibition at the New York World's Fair at the end of April, the Coronation Scot will make a tour of American railroads embracing 38 cities and towns and covering in all 3,121 miles. During the tour, the train will travel under its own power throughout and will be manned by an L.M.S. crew.

The Coronation Scot celebrated its "first birthday" in July, having been introduced a year ago as the first streamlined train between London and Glasgow, covering 401 1/2 miles in 6 1/2 hours.

Streamlined "Coronation" type locomotives which maintain the service hold the British speed record of 114 m.p.h.

The forthcoming American tour of the train follows the successful visit of the L.M.S. Royal Scot to America in 1933, when it was inspected by over 3,000,000 people.

## Keeping Tab

### Germany Introduces A Family Book To Keep Records Of Families

Under a new law, which has just come into force, Germany has abolished the marriage register.

Instead, a "family book" for each family in the reich is to be kept, which will show births, marriages and deaths and be a complete record for all the members of the family.

It is hoped thus to "stimulate interest in the family, show members that they are connecting links in a long chain of generations and to awaken a feeling of responsibility for the maintenance of the family and of the German nation."

When couples marry in future, new leaves to cover their racial classification, relatives, domicile, etc., will be inserted in the "family book." Offspring of the marriage will be entered in the same pages until such time as they grow up and marry, when a new series of pages will be started for them.

The new law also applies to Germans abroad and it is hoped that within 30 years, as children grow up and marry, exact details of every German family will be entered up.

## Attacked By Wild Bees

### Six Camel-Riders In India Were Stung To Death

Six Delhi, India, camel-riders of a passing caravan were stung to death by a swarm of bees in Suranagar. According to the story of the only survivor, the caravan which had halted near the jungle, was attacked by bees shortly after the men had lighted a fire to cook their food, just below the hives. The victims, who ran in all directions, were pursued by the bees, which stung them to death in half an hour. The survivor ran off, leaving the camels to take care of themselves.

Motiere was asked why in some country the king may assume the crown when 14 years old, but cannot marry until he is 15.

"Because it is more difficult to rule a wife than a kingdom," was the reply.

Another thing that slows up building is the realization that anything you build now will look queer by 1950.

## RAILWAY OFFICIAL RECEIVES PROMOTION

NORMAN B. WALTON

formerly chief of transportation, Canadian National Railways, who has been promoted to Vice-President in charge of Operation, Maintenance and Construction, with headquarters in Montreal. Mr. Walton is one of the best known railway executives in the West and was formerly General Superintendent, Manitoba District and later General Superintendent of Transportation, Western Lines. He was born in Palmerston, Ont., and commenced his railway career in 1906 as clerk in Toronto with the Grand Trunk Railway.

## Poultry Market

### Surplus Of Chicken Crop To Be Shipped To Britain

The 1938 indications are that the surplus of the Canadian chicken crop will go to Great Britain, the Department of Agriculture said. "Dressed chickens between three and five pounds weight sell most readily in Great Britain and to maintain a satisfactory export movement from Canada to that country a reasonable quantity of chickens of that weight is necessary," it said.

"Unfortunately, it is not the normal practice of Canadian producers to market chickens of that weight, but this year there are special reasons for doing so. The stocks of chickens in Canada are low, the prices for live chickens in the United States are not so attractive as a year ago and the signs in Great Britain are that there is an outlet for all the dressed poultry Canadian producers can offer."

## Refused To Sell

### Paris Custodian Keeps Blotter Used By King George

A Briton's offer of 10,000 francs (about \$275) for the blotter King George VI. used after he placed his signature in the Golden Book of the Arch of Triumph was turned down by the chief custodian of the monument, the newspaper Paris-Soir reported. "I do not traffic in such souvenirs," the custodian was quoted as saying. The blotter was said to contain an excellent reverse imprint of the Royal signature.

## Knows Where To Go

### Dog Visits A Veterinarian To Have Ears Treated

Paddy, Chesapeake Bay dog, owned by Mr. and Mrs. M. D. McLean of Calgary, knows when to visit the veterinarian. Taken by his owners to a veterinarian some time ago to have painful ear cankers dressed, "he now goes alone every time his ears hurt," said Mrs. McLean. "The treatment is painful but Paddy seems to know he must endure it patiently if his ears are to stop hurting him."

"You are a naughty boy, John, fighting that nice boy, Eric. He's such a nice face!"

"Not now," said John.

## Bank of Montreal

(Continued from first page)

Canadian money—are preserved in the bank's museum in Montreal.

Not only did the bank provide a medium of exchange such as had hitherto been lacking, but it nursed along the early enterprises of the country, and straightened out the difficulties of interurban, interprovincial and international trading.

One of the most important factors contributing to this achievement was the policy, adopted by the bank's directors at the inception of setting up branches and agencies at strategic points in the colony. For instance, two weeks after the founding of the institution in Montreal, the directors opened an agency at Quebec City, which six months later became known as an "Office of Discount and Deposit". In the following month agencies were appointed at Kingston, which was then important as a garrison town, and York, as Toronto was then known, which with a population of 1,000, was an outpost for lumbering and the fur trade—industries which formed the only basis for the export business of the country.

And so it was everywhere throughout the country as conditions demanded the bank planted its branches for facilitating the agricultural development of the country, its manufacturing industries, and its general commerce.

Since those pioneering days when the bank's officers travelled from branch to branch, "at first safe opportunity" as old records say, to this modern era when the institution sends its representatives out to the frontiers by airplane to open branches in the mining country, the history of the Bank of Montreal copiously demonstrates that the pioneering spirit of Canada's earliest bankers has motivated the conduct of their successors from one generation to the next.

Today the bank has more than 500 branches throughout Canada and Newfoundland, with its own offices in London, New York, Chicago, and San Francisco. The size of its capital and reserves at \$75,000,000 today stands in sharp contrast with the corresponding figure of 120 years ago when the bank began business with \$350,000. Perhaps a more graphic indication of the bank's growth and the assistance it has rendered toward the development of the country is the fact that today it has over a million deposit accounts—about one in every four in the Dominion.

"The vastness of the world's technological development is to be taken as a danger signal, not as something upon which to build a hope for higher civilization." — Professor Algy Noad.

## Viking Items.

A mysterious fire of unknown origin destroyed the large barn on the T. A. Cox farm, seven miles east of town on Friday night. It broke out about 11:30 p.m. and sustained a loss estimated at about \$2,700.00. Luckily no animals were in the barn at the time. The contents of the barn which comprised 10 sets of harness, some hay and feed, forks and tools, also went up in smoke.

The fire was first discovered by Albert Gray who was returning from town about midnight. He gave the alarm and awakened Mr. and Mrs. Cox and two two hired men, who were asleep in the house, unaware of the fire. Mr. Cox had been at the barn about 10 o'clock to give medicine to a sick horse and turned it out to pasture. The switch for the electric lights in the barn was turned off at the house as was the usual custom to avoid any fire from starting from this source. When first discovered, the flames were shooting out of the top of the barn and beyond control. A bucket brigade was formed and efforts were directed towards saving the nearby buildings.

It is believed that a transient, perhaps known in the district, had put up for the night in the barn, lit a cigarette or pipe, and accidentally started the conflagration. Before taking his hurried departure he thoughtfully let loose a valuable pony in one of the stalls, which at first was thought to have perished in the flames but later found grazing in the pasture. In the morning a packcase containing socks, some .32 rifle shells and small stuff was found at the west gate which had presumably been dropped by the transient in his flight to get away from the fire. No clues as to the identity of the lonely visitor were found. The theory of incendiary origin is discounted. Police are investigating.

The barn which was built in 1927 was a substantial structure 32 x 45 feet with a lean-to 16 x 45, partly covered by insurance. We understand that rebuilding operations will commence soon.

Mr. and Mrs. Harry Brown and daughter, of Wadena, South Dakota, and Mrs. Albert Brown of Plentywood, Montana, are visiting relatives and friends in this district for a few weeks, making the trip by car. Mr. Harry Brown is brother of Fred Brown. This is their first trip to Alberta and they are very favorably impressed with this section of the province.

Magistrate A. I. Miller, of Sedgewick, has been appointed magistrate of the Edmonton police court and is succeeding magistrate A. H. Gibson who has been dismissed by attorney-general Wm. Abernethy. C. G. Purvis, formerly of Viking, is police court prosecutor. Mr. Miller's successor has not been named as yet.

The condition of C. A. Harden, of Wainwright, who was injured in a car accident four miles east of town on July 21st and taken to the Viking hospital, remains about the same. He is still unconscious. His daughter, Miss Ruth Harden, who suffered a broken leg and lacerations about the head, is improving.

Edward Watkins, of Midwest, Wyoming, was a visitor here over the week-end. Edward is a former resident of this district and will be remembered by many of the early settlers. He is doing well in Wyoming, where he is employed in a large oil and gas field.

Mr. and Mrs. H. A. Meredith and daughter Miss Verna have returned from a two weeks' stay at Elk Island park. Quite a bit of rainy weather was encountered at the lake which put a damper on their holiday to some extent.

The Viking municipal hospital board held their regular meeting last Saturday afternoon. The question of a much needed addition to the hospital was again discussed and efforts to get financial assistance from the federal government were planned.

Mr. C. L. Anderson has returned from a holiday spent at the coast. Mr. Anderson has received notice of transfer to the Sedgewick branch of the Bank of Montreal and will leave shortly to take up his duties there.

## BOARD TO TAKE

## NEW WHEAT ONLY

Winnipeg, Aug. 9.—The Canadian Wheat Board issued a statement Monday stressing that the fixed price of 80c a bushel for No. 1 Northern wheat, delivered at Fort William, applied only to new crop wheat.

Old crop wheat will not be accepted for delivery and companies were requested by the board to see that old crop wheat, in store either in country elevators or in terminals, is not offered to the board.

moisture deficiency each year. During the current season in this province, for instance, Peace River had abnormally dry weather.

Bank of Montreal  
Crop Report No. 9

General—Harvesting is now fairly general in the prairie provinces, with rapid progress being made in Manitoba, Saskatchewan and southern Alberta. Wet weather in many districts has temporarily delayed cutting, but the moisture has been beneficial to late crops and pastures. In central Alberta warm weather is needed to hasten the ripening of crops. The effects of rust in Manitoba and eastern Saskatchewan are becoming evident as harvesting progresses, and yields and grades of susceptible varieties of wheat will be appreciably reduced. Grasshoppers are damaging standing crops in parts of Manitoba and Saskatchewan. Further hail damage has occurred at widely scattered points. Quebec province continues to enjoy ideal growing conditions, with warm weather, accompanied by light rains in many districts. Prospects as a whole are good for a satisfactory harvest. In Ontario harvesting is well advanced and good average yields of the main crops are in prospect in all sections. Moisture conditions are satisfactory and growing crops continue to make favorable progress. Prince Edward Island crop conditions continue to be favorable, with excellent prospects. In New Brunswick and Nova Scotia, following an over-abundance of rain during recent weeks, several days of sunshine in the past week have benefited all crops. Early grains are ripening rapidly and good average yields are indicated. British Columbia has enjoyed cooler weather during the past week, with heavy showers in most districts, which have been very beneficial to crops generally. Harvesting of grain is under way in the interior, with good yields on irrigated lands, but only 45 per cent of average on dry farms.

Prairie Provinces  
Alberta—Conditions generally are satisfactory, except in northwestern and southeastern districts. Cutting, which had commenced in most districts, will be delayed for a few days by recent rains. The moisture will, however, prove beneficial to late sown grains. Further hail damage has occurred in scattered areas in the south-central district. A good average crop of all grains is anticipated.

Saskatchewan—Wheat cutting has become general and indications are that there will be a wide variation of yields. In the south-eastern, south-central and east-central districts rust has shown further development on susceptible varieties of wheat, and it turns will be seriously reduced in the affected areas. Grasshoppers are damaging crops in the southern and central regions. Pastures generally are satisfactory.

"If war should come, the North American nations could not possibly keep out of it and the greatest and most urgent need is a restoration of some kind of sanity in international life."—Dr. J. S. Thomson.

"Economic balance is the key to the friendly relations between Canada and the United States."—Sir Herbert Warner.

## Golf Week in The Canadian Rockies

The Banff Springs Hotel's annual golf week is set for August 22-27, and the cost for the long list of cups and prizes will be waged in a mountain setting so beautiful as to make the old adage, keep your eye on the ball, doubly difficult of fulfillment.

Golf week at the Banff Springs course will see many notable U.S. and Canadian amateurs with a sprinkling of British and European entrants, fighting it out for the Edward Prince of Wales trophy, put up by former King Edward VIII, and the Willington cup for men. Associated Women's cup and the Brewster trophy and a host of other coveted awards for women.

As much a social as a golfing event, Banff's golf week is the signal for a round of informal entertainment centred at the hotel. The Banff Springs Hotel, beneath the terrace of which the great golf course winds down over the Spray River for 6,540 yards of unrivalled fairways and greens. A golfer's hall in the big hotel ballroom Saturday night brings the week to a close with presentation of cups and prizes.

The spectacular Banff Springs course has its fairways laid along the valley of the Bow River into which the rushing Spray dumps its green waters beneath the towering first ice. Unmatched for beauty, the course also ranks among the world's best for its length, trickiness and general smartness of design. Pictures above show the Edward Prince of Wales Cup and views of the course.

### An Educational Need

"The strength of a nation depends to an incalculable extent upon its educational facilities."

A whole volume—nay, many volumes—of wisdom and truth are couched within the foregoing sentence, an extract from a brief submitted to the Rowell Commission on Dominion-provincial relations by two professors of the University of Toronto on behalf of the student body of the nation. The purpose of the brief was to present to the Commission claims of students for the establishment of State scholarships to permit entry to the universities of the country of many who could never afford the opportunity which these institutions yield for broadening the mind and for training for leadership but who, otherwise, are well qualified.

The request for the establishment of such scholarships is based, not so much on the need for training minds which might subsequently be expected to be capable of contributing to technological development, but rather to ensure training of experts in the field of the social sciences, a sphere of activity in which, it is pointed out, comparatively little research work has been undertaken in Canada and for which no provision has yet been made in the programmes of the National Research Council.

Information supplied the Commission shows that in this respect Canada lags far behind the other Dominions as well as other leading countries outside the Commonwealth; that in this country there is no provision for State matriculation scholarships and that the number of awards from private sources is relatively small.

#### West In The Cold

Moreover, data and statistics contained in the brief demonstrate conclusively that in the matter of scholarships available from private sources the western provinces are discriminated against to an extraordinary but quite understandable degree. For, to quote the brief, "of 524 matriculation scholarships available annually in this Dominion having an aggregate value of \$108,140, the Province of Ontario receives 285 with an aggregate value of \$78,000, leaving less than half the amount to be distributed in 236 awards in the remaining eight provinces."

As a result some of the brightest minds are directed to the eastern institutions of learning and, again to quote the brief, "this is the west deprived of the very men who might be expected to contribute most to a solution of her pressing economic, social and political problems."

Because of this situation and because of the inequality of the provinces, and particularly the western provinces, to finance scholarships to anything like an adequate degree, it is suggested that Federal aid be sought to enable the provinces to finance State scholarships and thus provide at least the means to ensure the education of those who show greatest promise in the field where the west urgently needs assistance—the cultivation of minds capable and fully equipped to solve problems of great magnitude.

#### Not The Entrance Key

It might be urged in opposition to such a plan that already too many students are being turned out of western universities for whom apparently there is no place in the commercial and economic life of the country under present conditions, but this can at least be partially attributed to the fact that brilliance and ability do not furnish the open sesame to the university classroom.

In too many instances desks in the university classrooms are occupied by students who are sufficiently apt to scrape through entrance and subsequent tests with a minimum of effort and whose parents furnish the wherewithal simply because it is the thing to do; because a university degree is regarded as a hall mark of class distinction, or because it is believed that social or business contacts made there will be of some assistance in later years.

On the other hand many who are mentally equipped to a far greater degree and who could derive a great deal more benefit from a university education are unable to do so because of family poverty or because of their own inability to finance their way through college. Thus there is a real loss not only to the individual and the family but to the community and perhaps the nation. Scholarships, such as those proposed to the Rowell Commission would, to some extent at least, remedy this condition.

#### Of Further Importance

There is a further thought worthy of consideration when the establishment of state scholarships is under advisement. When it is remembered that the universities are expected to turn out men and women who will, and should be, leaders of opinion in their respective communities and provinces, the necessity of affording every opportunity to youth of brilliant mind, capable of clear and logical thinking, to pursue their studies to a conclusion, is highly important in a country which is only now shaping her future destiny, and in a day and generation when democratic institutions and form of government are threatened by new and untied political and social doctrines.

With a large number of people too inert to do their own thinking and willing to be stampeded in any direction at the behest of glib oratory, it is highly important that encouragement and opportunity be given to talent wherever it may be found and to give the best brains full opportunity for development in order that leadership in the future may be founded upon experience, logic and sound commonsense, if the country is to make progress and the future is to be assured.

#### Cost Of A Dukedom

It cost \$350 (\$1,700) to give the Duke of Windsor his dukedom. Supplementary civil estimates included an item for stamp duties on "royal warrant, letters patent and the docket creating the Dukedom of Windsor."

People are reading fewer but better books than they used to, says a librarian. If they read only the better books they are certainly reading fewer.

Silkworms outgrow their skins four times during their rapid growing period.

#### No Longer Plentiful

Union leader at Seattle says white collar workers must organize. But where, oh where, have the white collar workers gone? We've just glanced around a roomful of chaps generally supposed to be in that class and could count only two white collars in the lot. The rest were blue, green, tan, gray, polka-dotted and doubtful.

"What's next on the screen?" asks a movie gossip writer. Flies, we guess.

Snakes shed their eyelids when they shed their skins.

### Canyon Under The Pacific

Is Believed To Contain All Varieties Of Minerals Known

The discovery of phosphorus 1,000 feet under water on a Pacific ocean canyon opens a new world for fortune hunters. The finding was described at the Scripps Institute of Oceanography by Dr. F. F. Shepard, geologist of the University of Illinois.

The fertilizer rock was dredged from the upper walls of the submarine canyon 50 miles off the shore of California. The phosphate nature of the rock, he said, was determined by K. O. Emery, who is making a study of the rocks collected from the canyon.

This canyon is one of scores discovered in ocean bottoms by geologists in the last two years. The canyons are in all oceans. They are an exception, however, in that the bottoms are not muddy. Their walls are rocky and the rocks are of all kinds, like those on land.

There is reason to believe that the submerged walls contain all the varieties of minerals known. Some of the canyons are as large as the Grand Canyon of the Colorado River. The phosphate rock canyon is V-shaped. Its bottom lies half a mile under water. Its sides are from 1,200 to 2,000 feet high. Dr. Shepard's dredge took the samples from a stretch 20 miles long, indicating that the deposit is probably extensive and rich.

The phosphate was identified as of the Miocene Age. That age ended about 17,000,000 years ago. It is possible, Dr. Shepard said, that phosphate may be forming now in the submarine canyon. From this same area where it was found he brought up fossil bones of an unidentified animal.

The geological prospectors seek to learn the origin of these great chasms in ocean bottoms. They are among the most mystifying discoveries ever made. Their walls range from granite to soft shale. Some of the rocks are volcanic, but most of them are sedimentary, which means that they were formed by the weight of huge deposits of earth.

### To Guard Switzerland

Little Country Has Devised Unusual Means For Its Defence

Hundreds of little, round metal manholes cover the highways and byroads of Switzerland near the Confederation's frontiers with Germany. They're a key part of Switzerland's national defence system.

Beside the highways lie piles of steel rails. Most travelers who see them think they've been left by the roadside to rust by careless-railroad workers. Investigation, however, may show one end of the rails has been ground into a sharp point. When hunky Swiss soldiers hold their manoeuvres on the frontier, however, the secret is out. In the "barricade" the "war" begins when the hypothetical enemy crosses the frontier.

Sharp stuns scream out in the frontier towns and villages. The troops tumble out of barracks and rush to their defence positions while the villagers and Swiss farmers run to the highways.

Some villagers, using the simple old lifts all Swiss kitchens have by stove, raise the little iron manhole covers. Others carry the rails out to the highways.

The little round holes reveal a deep slot with a reinforced concrete base. In go the rails with the sharp points pointed toward the frontier at a 45-degree angle. Within less than two minutes after the villagers arrive the road literally bristles with steel rails completely blocking the way of any tanks or motorized units that should come from the frontier.

"These little round holes in the road," said an officer of the Swiss frontier troops, "mean the minutes, perhaps hours, of delay that may some day save Switzerland."

### Making Use Of Drugs

Japanese Trying To Undermine Health Of Chinese In North

War has always brought misery in its train, but there can be nothing in history to fowl as the manner in which the Japanese are now trying to undermine by the use of drugs the health and morale of the inhabitants of the occupied area in the north. China and the world will always remember the stern and effective steps taken by Generalissimo Chiang Kai-shek to stamp out the drug traffic and will regard the Japanese with loathing for the policy they are now following of encouraging the use of drugs amongst the Chinese and foreigners who are temporarily within their sphere of influence.

Hong Kong Press

Airplanes may replace mule-trains as a means of exporting chicle from dense jungle of northern Guatemala.

In Java, thunderstorms occur on an average of 223 days a year.

### Religious Broadcasts

Sunday Afternoon Sermons May Be Started In October

Although the newly-created national advisory council on the broadcasting of religious services includes representatives of the five larger Canadian churches, smaller religious organizations will not be neglected in religious broadcasts. Major Gladstone Murray, general manager of the Canadian Broadcasting Corporation, indicated.

Smaller denominations, including the Salvation Army, Disciples of Christ, Christian Science and Latter Day Saints will be given opportunities to share in the broadcast.

The national council is composed of the following: Rev. Carl V. Farmer, Baptist; Rev. Briarly Browne and Rev. J. E. Ward, Church of England; Rev. J. B. Thompson and Rev. Joseph Wason, Presbyterians; Miss Edward M. Brennan and Rev. Charles Laupheimer, Roman Catholic; Rev. J. R. Mutchmor and William R. Orr, United Church. All are from Toronto. Mr. Ward is chairman and Mr. Mutchmor secretary of the council.

It is proposed to provide two national half-hour religious broadcasts Sunday afternoons and regular half-hour regional broadcasts of religious services Sunday mornings.

The morning broadcasts will not be started until January at the earliest but the afternoon broadcasts will likely begin in October.

The corporation has set aside one half-hour, 12:30 to 1 p.m. (M.S.T.), and the half-hour 3:00 to 3:30 p.m. (M.S.T.) for the new broadcasts. The first half-hour has been allotted by the advisory council to the Roman Catholics and the second to the Protestant churches starting as follows: Oct. 2, Baptist; Oct. 3, Church of England; October 16, Presbyterians; Oct. 23, United Church.

### Good News For Neighbors

Amateur Pilot Forbidden To Fly His Home-Made Plane

Herman Schapansky, Weatherford, Okla., the butter and egg farmer who pilots his home-made planes to one-point landings on the nose—has been grounded.

He was ordered to stay out of the air because he has no pilot's license. Neighbor farmers, accustomed to scurrying to storm cellars when they heard the sputter of Schapansky's motors, breathed a sigh of relief.

Schapansky, who soiled and crashed the first time in a jump, turned to his wife and said: "I'm a good flyer. They don't give an ambitious young man a break in aviation any more. How far do you think the Wright brothers and Lindbergh would have gone if they'd got caught in this red tape?"

It was said most of the time Schapansky flies directly down a highway, so when he crashes he will be in a convenient place where his wife can pick him up.

On his last solo flight, fortified only by the lessons he exchanged for chores at an airport, Schapansky said he went up 200 feet, stalled and crashed. Neighbors pulled him from the cockpit bleeding.

Undismayed, Schapansky built more planes. Few of them flew long and crackups became so regular his wife said she stood by a telephone, the family car and trailer waiting nearby, ready to get him and the plane when it plumed down in someone's pasture.

No person ever went up with Herman.

### Believe In Miracles

Couple In Ontario Escape Death In Grade Crossing Accident

At least two people in Ontario must believe that miracles still happen, as well as accidents.

Their car stalled on a grade crossing.

A train came along at 80 miles an hour and cut off the front portion of the car as cleanly as if a giant knife had done it.

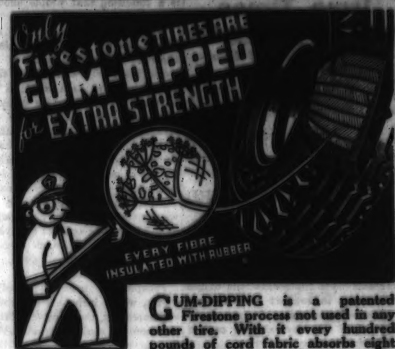

They were left seated in the other three-quarters, without a scratch, although suffering from shock.

There's a man and his wife who have something to write home about. Unfortunately, for most people who drive onto grade crossings, when trains are approaching, there's nothing to write home about except funeral arrangements. — Detroit Free Press.

Sir Henry Morgan, the famous pirate, was knighted by the King of England and made lieutenant-governor of Jamaica because of his fearless expeditions against the Spanish.

Peter Topp, foreman of the fish hatchery in Yosemite National park, eastern California, trains wildcats for a hobby.

In Java, thunderstorms occur on an average of 223 days a year.

**ONLY FIRESTONE TIRES ARE GUM-DIPPED FOR EXTRA STRENGTH**

EVERY FIRE INSULATED WITH RUBBER

**GUM-DIPPING** is a patented Firestone process not used in any other tire. With it every hundred pounds of cord fabric absorbs eight pounds of rubber and, as a result, every fibre, every cord and every ply in a Firestone tire is coated and insulated with pure rubber to counteract internal heat and friction—the greatest enemy of tire life.

Due to this extra process, Firestone Gum-Dipped Cords have 55% longer flexing life. Yet you do not pay one cent more for this extra value. And you also get 2 Extra Cord Plies under the tread and the Firestone Scientifically Designed Safety Tread.

See the nearest Firestone Dealer today!

"MOST MILES PER DOLLAR"

### SELECTED RECIPES

#### SALMON MOLD

- 1 package Lemon Jell-O
- 1 pint hot water
- 3 tablespoons vinegar
- 1 teaspoon salt
- 4 teaspoons drained horse-radish
- 1 cup flaked salmon
- 1 cup cooked peas, fresh or canned
- 1 cup cooked diced carrots

Dissolve Jell-O in hot water. Add vinegar and 1/2 teaspoon salt. Four small amount of Jell-O in bottom of loaf pan. Chill until firm. Chill remaining Jell-O until slightly thickened. Add 1/2 teaspoon salt and horse-radish to salmon and vegetables and mix very lightly. When remaining Jell-O is slightly thickened, fold in fish and vegetable mixture. Turn in to loaf pan over firm Jell-O layer. Chill until firm. Unmold and cut in squares. Serve on crisp lettuce. Garnish with mayonnaise and sprigs of parsley. Serves 8.

#### BEEF LUNCHEON SALAD

- 1 package Lemon Jell-O
- 1 pint hot water
- 3 tablespoons vinegar
- 1 teaspoon salt
- 1 1/2 cups diced cooked beef
- 1 1/2 cups shredded cabbage
- 1/2 cup diced green pepper
- 1/2 teaspoon scraped onion

Dissolve Jell-O in hot water. Add vinegar and 1/2 teaspoon salt. Chill until slightly thickened. Season beef, cabbage, and green pepper with 1/2 teaspoon salt; add onion. Fold into slightly thickened Jell-O. Turn into individual molds. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise and slices of hard-cooked egg or stuffed eggs. Serves 8.

### Do All Farm Work

Sisters Have Managed For Forty Years Without Help

Miss Mary Williams has died at the Misses Williams' farm near Woodford, England, but her three sisters will continue to run the place without a man to help as the four had done for 40 years. The sisters plow, make hay and run a market garden, and with their ancient spinning wheel spin yarn. They also make their own clothes and stockings.

WELL... I MUST BE GOING HAVE A SNACK, FIRST OH, DON'T GO TO ANY TROUBLE NO TROUBLE, WE'LL JUST RAISE THE REFRIG.

THE UTILITY OF  
A WHEAT BOARD

It is gratifying to note the degree of solidarity with which the majority of the people of Western Canada have gotten behind the Wheat Board this year and made representations to the government in support of a reasonable initial payment. It is many years since the west showed such a united front.

The fact that there is a Wheat Board today is due to the determined insistence of the Wheat Pools of Western Canada. These organizations sent delegation after delegation to Ottawa during the past eight years to press the need of a Wheat Board before the federal government. They also presented the case for a Wheat Board before various governmental inquiries and commissions. In all these activities they had the support of the United Farmers of Alberta, the United Farmers of Canada, Saskatchewan Section, and the United Farmers of Manitoba. A few other organizations such as the Association of Rural Municipalities, gave appreciated support.

The need for a Wheat Board during the depression years was obvious. In most countries of the world wheat had been taken out of the economic field and became a political question. Canada was slow to realize what had occurred largely due to the advice of economists of the orthodox school and the grain trade of this country. Their contention was that the adverse conditions being experienced by wheat producers were transitory and would shortly disappear.

Of course, the trouble started when the world raised a record wheat crop in 1928 and stock markets collapsed in 1929 when the depression was ushered in. Wheat sank so low in price that in some instances the railways carrying the grain got more for their services than did the producers. The world's surplus piled up until it reached the total of over 1,100 million bushels.

Some people soothingly said that low prices would increase consumption and the surplus would be taken care of in that way. But consumption did not increase because of low prices. In fact it has remained remarkably even during the past ten years.

The surplus was eventually cleaned up, but by what process? Sixty years ago in North America, the worst this continent has experienced in 50 years. The United States became a world wheat importer for the first time in 100 years. The Canadian prairies were scorched by year after year of excessive, unprecedented drought.

In addition, another large wheat exporting nation, Argentina, experienced two major crop disasters with only one year intervening. In 1935 Argentina had one of the worst droughts in her history and lost half a severe frost destroyed at least 70 million bushels of wheat.

So that it took a series of calamities following each other in quick succession in three of the great wheat exporting countries of the world to get rid of the wheat surplus which was really started by the huge 1928 crop, and to restore the price level to a decent figure. Crop disasters of such extent will hardly occur in such quick succession among so many countries for a long time to come.

It is just a year since the world wheat surplus was cut down to a reasonable figure and now the 1938 production can be fairly well estimated. The best authorities are convinced that the world's production this year will touch an all-time peak, exceeding the record-breaking crop of 1928, which caused all the wheat surplus troubles, by at least 200 million bushels. So it looks like the "wheat problem" is back on the world's doorstep once again. It is these circumstances that make the Wheat Board a necessity in Canada today. If the Wheat Pools had not struggled and fought until they got a Wheat Board in 1935, western wheat producers would have nowhere to turn today and the outlook for them would be black indeed.

There is a fair crop in Western Canada this year. A large number of farmers, who haven't had anything like a crop for six or seven years, will have some wheat this fall. The fairly high prices of the past two years meant nothing to them for they got no benefit from them. This year when they have something to sell prices have hit the high. This

is a condition that people should not overlook.

Western wheat producers need a Wheat Board. The outstanding authorities on wheat matters in the world are fairly well agreed that the wheat industry as a whole is geared on too high a productive basis. European importing nations have demonstrated that they are not interested in cheap wheat. Last year there was some relaxation of restrictions on imported wheat by Europe, but the restoration of handicaps in many importing countries is already under way once again. World trade was only 500 million bushels last year and is not likely to be much larger during the 1938-39 crop year, which started August 1st.

Prospective world supplies of wheat, which include a carryover, are estimated by the United States department of agriculture at 4,850 million bushels, or about 475 million bushels above those of a year earlier. If Argentina and Australia did not raise a single bushel of wheat this year the world would still have a larger supply than last year by 75 million bushels.

Only unprecedented and unexpected wheat buying by Europe can improve the world situation appreciably during the next 12 months. In the meantime, the price prospect for wheat producers in the large wheat exporting countries is anything but cheerful.—Wheat Pool Budget.

## HARVEST LABOR 1938

Employment Service of Canada  
Province of Alberta

With the approach of another harvest season it would be wise to look ahead to the labor problem as it affects the farm.

Last year, with good crops scarce and confined to a few districts, and a crop failure in the province to the east of us, labor was more than plentiful, augmented as it was by an influx of farmers from the "dried out" districts of Saskatchewan. With fair to excellent crops in sight all over the prairies, these Saskatchewan farmers will not only not be here but will be hiring labor to harvest their own crops.

There will be considerable crop in areas where poor crops or none have been the rule for several years. These areas will be poorly equipped with labor-saving machinery of the latest type, and consequently will need their full quota of binder men and stokers, and thrasher men.

Where combines are in use there is a feeling that the binder should be used for part of the crop in order to build up the straw pile that was so sorely missed during the last few years. This, we hope, will add to the demand for harvest labor and we are anxious to direct to employment, with the utmost economy and efficiency, those citizens of this province desiring work in the harvest fields of Alberta and it is to meet this situation that the employment service has prepared its plans.

The railroads and bus companies are co-operating with the employment service in Alberta by granting a rate of 1 1/4c per mile one-way ticket to all harvesters sent out from the offices of the employment service of Alberta to points within the province. This rate is to be effective from August 1st to September 15th. This means that then will be able to get their jobs on schedule in greater numbers and farmers will know when to meet them, instead of the uncertainty of the hitch-hiking method.

In all the grain districts public-spirited men are co-operating by acting as voluntary agents for the employment service, to collect orders and information for the main office and will assist in directing men to the individual farmer requiring them when they arrive at country points. These men will be of considerable help in avoiding surplus or shortage of help in country towns and preventing a loss of time to farmer and worker.

The weakness in any good crop year has always been the tendency for harvesters to crowd so-called good districts beyond requirements, often causing a real shortage in other districts with consequent loss to both farmer and harvester. It is only by co-operation that this can be reduced and we ask this co-operation in the interests of all concerned. Use the Employment Service. It exists for your use. Keep it informed of your requirements, a day or two ahead of need if possible, and you may be assured the Employment Service will loyally co-operate with you in meeting your problems of harvest labor.

"It is commonplace that there has never been less unity in Canada than today, yet the spirit that made possible what Canada did from 1914 to 1919 can win through to national unity."—Rt. Hon. R. B. Bennett.

## WHEN TO CUT GRAIN

(Experimental Farms News)  
When the grain turns a golden color and the straw commences to rustle, the grower begins to put a commercial value on his crop. From then come many anxious days of waiting for the proper time to start the binder. Anxiety and the pressure of unpaid bills frequently prompt cutting to start several days too soon. "Better some shrink than a heavy loss from shattering or hail" is the justification. Too frequently the shrinkage does occur and green kernels or those with a greenish or bronze cast on wheat, mean the loss of one or more grades.

Red Bobs 222 and Garnet should be cut slightly on the immature side if shattering losses are to be avoided, states E. C. Stacey, assistant superintendent, Dominion Experimental Substation, Beaverlodge, Alta. When this is followed prompt stooking is imperative if advantage by way of some further filling is to be gained. Marquis can likewise be cut slightly on the green side and this may be preferable to chancing frost.

Reverend, on the other hand, must be harvested when quite ripe, otherwise the unevenly maturing crop will be shrunken in volume and quality. When cutting is thus deferred this variety frequently yields No. 1 grade at the Beaverlodge substation. Experiments conducted with Marquis and reward over several seasons suggested that wheat is ready to cut when it has reached the firm-dough stage. Scant justification was found for the popular belief that grain continued to fill in the stook.

Most varieties of oats shatter very little and can be left standing until ripe, though a few growers may ensure having frost-free seed by cutting a few swaths before the crop is fully ripe. In some Northern districts it is considered expedient to leave oats in the stook by the end of the first week of September regardless of maturity.

Barley shrinks badly if cut immaturely and should be left standing until fairly well ripened. Prompt stooking and capping is advisable.

WISE AND OTHERWISE  
WISE-CRACKS

By Alberta Editors

Vegreville Observer—The gauge has certainly been working over-time over at the B.A. elevator this week and has pulled in more rain than you could shake a stick at. Ernie Harns reports a full inch, but we would suggest that he take the darn thing inside for a little while now so that harvesting can get under way.

Manville Mirror—According to radio news, the Alberta government is going to issue crop without stamps. This time, to work off arrears of taxes. Why not pay cash first as last, because the money will come out of general revenue anyway, and seeing that there are 22 million of dollars arrears I hope this government won't issue a paltry 225 thousand dollars. This is a mere drop in the bucket.

Macled Gazette—Man is but a little worm. He wriggles a little, then some chicken gets him.

Unity (Sask.) Herald—We regret the few hours delay in this week's "Herald," which was caused by an unfortunate mishap just as we were going to press. As the first page was being lifted to the press it slipped, landing hither and yon on the floor. You can imagine what fun it would be picking a page up off the floor and having to sort it out and reset it. Strange as it may seem, the air was kept pure and sweet, not a syllable of profanity being uttered or even muttered at this annoying time.

## BE CAREFUL WHAT YOU SAY

In speaking of a person's faults, Pray don't forget your own. Remember those with homes of glass. Should seldom throw a stone. If you have nothing else to do, But talk of those who sin, 'Tis better we commence at home, And from that point begin.

I'll tell you of a better plan, And find it works full well, To try my own defects to cure, Before of others tell; And though I sometimes hope to be No worse than some I know, My own shortcomings bid me let The faults of others go.

Then let us all when we commence To slander friend or foe, Think of the harm one word will do To those who little know. Remember curses, sometimes, like Our chicken, "roost at home." Don't speak of others' faults until We have none of our own. —Northwestern Pacific Railroad.

Sound Banking  
PROTECTS  
the Community

The Bank of Montreal works constructively and conservatively for the protection of its depositors and the community as a whole.

Because the Bank has, for more than a century, endeavoured to do this, it has come to be regarded throughout the length and breadth of the Dominion as a sound, safe and friendly institution.

Make the nearest branch your banking headquarters — a place to which you can go regularly to transact your banking affairs, to obtain information, and to discuss with the Manager your plans and problems.

## POOR MAN'S GOLD

### COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER • W.N.U. SERVICE

## CHAPTER I—Continued

"Yah! If you can't go in by way of Wrangell, how do you go in?"

"By Fourcous, if you want to be a fool and try it."

"What's so tough about that?"

"The weather," Jack insisted. "You don't get any warm winds from the Japanese current, once you're over the Coastal range. It's 35 and 40 below, all the way to the Stikine."

"I know that," said Olson laconically.

"But why fight the bush for 200 miles with dog team when in a few months, there'll be airplanes, or easy travel along the river and mountain trails—"

"Yah," said Olson, "and find all the claims gone."

"Or you've gobbled up the whole country through a set of dummies," the red-faced man added.

"You can figure that out for yourself," Hammond answered abruptly, and shouldering through the crowd, again moved up the street, leaving the rustling muttering behind him.

But again, a block farther on, his progress was halted. This time it was a woman.

"Well, Prospector," she asked, "Can't you say hello?"

Hammond looked up into the features of a wrinkled person, valiantly battling her age with thick foundation cream, high rouge, mascaraed eyes and a heavily lip-sticked mouth.

"Yet it was a sprightly face, blue eyes set in crows-feet of humor and experience; lips which life had hardened without leaving them grim."

"Well, Annie," he exclaimed. "How are you?"

"About the same as the last time I saw you—when we made the rush together into Rojane, in Quebec."

"That's right—did to see you again, Annie."

"Thanks. That goes double, Prospector."

Silence followed. For an instant Jack Hammond felt annoyed at this interruption. Then he dismissed her. It was only around the World Annie who had made every Canadian gold rush of the last twenty years. Around the World Annie, with her lore of frontier knowledge, her inevitable thickness of paint and mascara and garish clothes, her log cabin at the edge of camp with its dance hall, illicit drink, its screaming phonograph—

"Living here, are you, Annie?" Hammond asked at last. Around the World Annie straightened. An effluent woman, with what might be called an old-fashioned figure, she groomed a loose fold of dress, and raised a diamond-fingered hand to restrain a wisp of bleached hair, willing with the dampness of the incessant rain. Then, with a jerk of her head, she indicated a group of dance hall girls who stood in a nearby doorway, as though they had been herded, all of them overdressed.

"Listen, Prospector," she asked, "would I be chaperoning that gang of girls if I was living here in Prince Rupert?"

"But where are you headed for?" She grinned, the wrinkles there in her creasing deep creases in her face enamel.

"I'm going where you're going, Sweetheart."

Hammond sighed.

"I suppose you were on this morning's boat too?"

"Got on at Vancouver."

Hammond pursed his lips. He was becoming more philosophical.

"What's between you and McKen-

sie Joe?"

"Oh, Joe's taking it all right. A little caustic, but—"

"Joe's natural state."

"Yes," Hammond laughed. There was an awkward silence. The attorney wiped his glasses, then sat crimping the edge of a sheet of legal paper.

"Not quite myself this morning," he apologized. Then, abruptly, "I'm not much good at telling people things that hurt."

"I guess I misjudged a lot on that boat."

"Oh, you'll catch up with it all," she leaned closer. "Just tell me this much. You're going on, on to-morrow morning's train, aren't you?"

"For the first time that morning, Jack Hammond truly smiled."

"Yes, Annie," he said. "You might as well pass the word along. I guess the secret's out."

"You're right, it's out!" agreed Annie. She patted him on the shoulder.

"Well, I'll be seeing you." Then with a grandiloquent wave, she summoned her followers from the doorway.

Hammond walked on, to the sting of fine rain against his face. The smile had vanished; gloominess had taken its place. Everything had looked so different down there in Seattle with Kay in his arms, and the secret that he had promised his partner to treasure flooding over liquor-loosened lips.

Kay—the thought of her electrified him. His brain suddenly shimmered with a thousand disconnected but glorious memories; blurs and figures from which only one emerged clearly. It was that of Kay Joyce, golden-haired Kay, with her blue eyes hypnotizing him, her soft body against his as they danced, or floating far away as all the world became vague and dreamlike. Kay light in his arms until he could see only the curve of her forehead and the uplift of her eyelashes. Or leaning on her elbows beside him, her hands crossed under her chin, her tantalizing lips curved in a challenging smile. Then the soft touch of her thigh against his as the music started anew and they rose to the call of the dance floor.

He stumbled and brought himself up short, suddenly realizing that Seattle was far away. This was Prince Rupert, bleak in the grip of a winter rain, yet burning with the gold fever.

A girl was coming down the steps; she had a hand to her throat, clutching it as if seeking, by muscular power, to overcome a desire to sob. Her face was bloodless; for an instant she looked at him, with hazel eyes in which burned the fever of desperation. Then bravely she straightened, and while he flattened himself against the scarred, plaster wall of the staircase, went onward.

In the glimpse of passing, Hammond could not help noticing the spasmodic jerk of her otherwise fine lips, the tenseness of her, the expression of gauntness with which she faced the drizzly square of outside light. A moment more and she was gone.

## CHAPTER II

Once in his lawyer's office, Hammond became something like that of a wayward boy, returned from truancy.

"Hello, Barstow," he said, as casually as possible, and eased into the chair. The attorney looked up. He was a man of middle age, with kindly eyes, which, this morning, seemed strangely troubled.

"Oh, it's you, Jack," came quietly. "Sit a minute, will you?"

"No hurry," Hammond picked up a copy of the Prince Rupert paper—and tossed it aside. It was not the edition he sought. The attorney shuffled a mass of legal documents into a container envelope.

"Well," he asked quietly—almost unhappily.

Hammond eyed him. Barstow was usually good for a joke.

"Stomach out of order?"

"No," he shrugged his shoulders. "Sore at me?"

"Why?"

"For letting this thing out?" The attorney smiled.

"That's between you and McKen-

sie Joe."

"Oh, Joe's taking it all right. A little caustic, but—"

"Joe's natural state."

"Yes," Hammond laughed. There was an awkward silence. The attorney wiped his glasses, then sat crimping the edge of a sheet of legal paper.

"Not quite myself this morning," he apologized. Then, abruptly, "I'm not much good at telling people things that hurt."

## "Bad news?"

"Nothing that concerns Joe or you. Some one who was in here just before you came. I had to be pretty frank—and the truth in this case is fairly rotten."

"That's always tough."

"Yes, to cut the foundations out from under somebody—destroy illusions, paint things exactly as they are. Especially with a woman."

"A young woman, wasn't she?"

"Rather good-looking—poorly dressed?"

"Oh, you saw her?"

"We passed on the stairs. She looked pretty well cut up. Client of yours?"

"Well—" the attorney hesitated. "Not exactly—sort of a volunteer client—that is—" With an effort, he assumed an attitude of brusque interest: "What are you in here about so early in the morning?"

"Joe left a note for me. Gone north—guess you know that. He's travelling light, without many supplies. Afraid somebody will jump our claims. Wants me to follow as soon as I can with a couple of dog teams and a complete outfit. That newspaper stuff—"

"Get it all out of your system down there in Seattle, did you, Jack?"

Hammond stirred uneasily.

"Well, that depends on how you look at it. Personally, I feel great about it. But someone else might just think I had been on an ordinary drunk."

"The newspapers gave you quite a play."

"I've been hearing about that ever since I landed. It's rotten in a way—I I stayed a lot of tenderfoot into that district."

"Oh," Barstow, elbows on his desk, stepped his fingers. "I don't think it's done so much damage. Just being the rush a little earlier—it would have come anyway. What happened in Seattle?"

"I met a girl I was in love with."

"One of those first-sight affairs?"

"No," Hammond put out his hand, holding it a few feet above the floor. "I've been crazy about her since I was that high. Kay Joyce. Her father used to be president of the Sunnatch Bank and Trust. He died about a year ago. We used to live down the street from each other. Father, at an angle—I lived by the alley."

"Childhood playmates?"

"No." A serious expression had come into the young prospector's eyes. "She'd never have anything to do with me."

"I don't quite understand."

"Her father was the big banker. My father was a switchman, out of work most of the time. My mother took in washing."

(To Be Continued)

## Gifts For Princess Elizabeth

Paris Sending Carefully Chosen Library Of French Books

Twelve-year-old Princess Elizabeth, who did not accompany her parents on their visit to France, will be presented by the city of Paris with a carefully chosen library of French books considered ideal reading for a growing girl.

It will be the first time Paris has ever bestowed such a gift on a royal child. Many of the great French classics were automatically ruled out in view of their inappropriateness for a girl of Elizabeth's age. On the other hand it was decided to avoid giving her a collection of children's books of doubtful permanent literary merit.

The books finally chosen, it was explained, may be divided into two groups—one appropriate for a princess from her 13th to her 18th year, the other more suitable for reading in later years.

The 20 books will furnish a permanent library on ancient and modern French culture.

## New Kind Of State

When one of the kinks of his radio receiving set refused to move, a man in Southern Rhodesia forced the dial and it began to vibrate violently. On looking inside the owner found a snake wound round the valves. The reptile was killed and reception resumed as usual, according to a Salisbury report.

Barber: "Haven't I shaved you before, sir?"

Customer: "No, I got that scar in France."

His Mother: "Willie gets more like you every day."

His Father: "What's he done wrong now?"

## Increase Colonial Troops

France Strengthening Her Armed Forces In Northern Africa

France is following the advice of one of her Great War generals by strengthening her armed forces with troops from the colonies—the "black reservoir" of man power.

General Charles Marie Emmanuel Mangin, commander of French colonial troops in the Great War, urged that a standing army of 1,500,000 men be kept in the colonies ready for action anywhere in France's world-wide empire.

Mangin, who died in 1925, sang the praises of the "black reservoir" but the French general staff turned a deaf ear to his plea until Edouard Daladier became Premier, 13 years after the general's death. Until this spring France's colonial army, which does not include her troops in North Africa, totalled only 73,000 men. One of Daladier's first acts was to call for the recruiting of 60,000 additional troops.

Military sources said that was only a beginning; that colonial troops alone would total 160,000. That still was far from Mangin's dream, but the new colonial levies already have raised the totals of France's armed forces to between 900,000 and 1,000,000 men. The new troops are being enlisted in French West Africa, French Equatorial Africa and Indo-China. The new African troops from below the Sahara will be an important item in the event of trouble with Italy.

## The War Debt

Britain's Obligations To United States Open For Consideration

The Earl of Stanhope, told the house of lords that the question of Great Britain's war debt to the United States "is left open for consideration at the moment both governments felt likely to arrive at a satisfactory settlement to each."

Lord Stanhope, government leader in the house of lords, declared: "It may be well to contradict suggestions sometimes made that His Majesty's government fail to recognize the great importance of this question or that the debt has been repaid."

He spoke after Viscount Samuel, Liberal, suggested the United States be urged to parole the debt because of the British government's rearmament program "which is intended to safeguard the peace of the whole world."

## Enjoy Seeing Trains Arrive

People In City And Country Are Very Much Alike

Many pictures and stories concerning new streamlined trains inaugurated on many railroads indicate that these trains are reviving a good old American custom, according to the Bloomington, Ill., Telegraph.

In the early days inhabitants of small towns used to rush down to the "depot" to see the train come in. Stories and films from Hollywood now depict that as still one of the customary ways.

But these streamliners, it seems, have attracted attention and been the cause of crowds collecting at the "depot" in some of the largest American cities. To see the train come in or go out. After all, these are just like the country folks, only more of them in a given area. They still like to watch the trains go by, just as their forbears used to do.

## A Noteworthy Fact

"Democracy" says Thomas Mann, "is nothing but the political name for the ideals which Christianity brought into the world as religion." It is a noteworthy fact that most of the countries which discard democracy eventually discard Christianity.

Lord Tweedsmuir says the best answer to the folly of dictatorship is laughter. As long as you remember to laugh before you get your dictator.

The policeman can dive from the air and snatch a swiftly moving fish that is far beneath the surface of the water.

## Creative Music For Children

New Idea For Schools Is Explained By Teacher

Creative music, played on homemade glass instruments—a xylophone is eventually planned—drew aesthetic sighs of pleasure from a group of girl students.

"It's a new wrinkle in school music," explained Mrs. Carl S. Sullivan, the teacher, as she surveyed the results obtained by her class of girls at the Young Women's Christian Association in Elmira, N.Y.

The girls stopped up to a table lined with glass tumblers filled with varying amounts of water. They tapped the sides with the spoons and the result was a clearly defined rendition of "Three Blind Mice."

"Even unmusical children take pleasure in learning the scale when tumblers represent notes," she cried.

The music makers, she said, were constructing a xylophone from bars of plate glass, which was "a very difficult task" since the ring of glass varies unaccountably—regardless of length.

Emphasizing the importance of music in character building, Mrs. Sullivan recalled the advice of Walter Damrosch, noted symphonic conductor.

"Give a child a horn to blow and he'll never carry a gun!"

## Aid To Fishermen

Rehabilitation Work In Southern Alberta Results In Secondary Industry

Farm rehabilitation work undertaken by P.F.R.A. in the Rolling Hills district of southern Alberta has made possible a secondary industry—fishing.

During the past winter, several carloads of whitetail were taken from Lake Newell and shipped as far as New York for sale. P.F.R.A. officials said.

The Rolling Hills irrigation scheme was in existence before the advent of the farm rehabilitation program but repairs and improvements were effected through P.F.R.A. work.

When the level of the water in Lake Newell was raised, it was stocked with fish. Last winter fishing on a commercial basis was resumed with the result that several carloads were shipped out of Alberta for eastern American points.

## Served By Expert Chefs

Royal Dinner In Paris Was Something To Remember

The ten best French chefs combined their culinary skill to fete King George and Queen Elizabeth. The result was something to marvel at. The gastronomic highlight of the three-day royal visit of state, served in the brilliant Hall of Mirrors of Louis XIV, made every French restaurateur and gourmet sigh with envy.

The experts burned with shame, too. The royal program allowed only 45 minutes for the super-meal, and to do it justice, they said, would take at least three hours.

The vegetables were grown specially out of season at Limoges and flown to Versailles in two planes. Table baskets containing cakes were made of woven straws of sugar tied with sugar ribbons in the French and British colors.

## Famous Toy Maker

Man Who Created The Teddy Bear Dies In New York

Morris Michton, 68, Russian immigrant doll maker, whose teddy bear was the childhood joy of millions of Canadians and Americans, died recently in New York.

A pioneer in the North American doll industry, Michton was chairman of the board of the Ideal Novelty and Toy Company, which he founded in 1903, 14 years after he came to New York from Russia, a penniless immigrant.

When he started his business, the teddy bear, his first creation, became an immediate success. He made one of the first unbreakable dolls, then revolutionized the trade with "children" that blinked their eyes.

## The Tin Can Era

Housewives are busier these days—at least in the use of can openers. The board of public works in Los Angeles reports that tin can collections now total 130 truckloads a day, as against only half that amount in 1931.

Did you read about the hitch-hiker who left an unfinished sandwich on a truck and then followed it clear across the continent? Friend, when a man dogs a bite, that's new.

Brazil has decreed that stocks of coffee at ports must never exceed 3,450,000 bags.

Good to the first drop—the stock market

Yes, Sir—  
**DEE NIVE Syrup**  
is my

## Planned Health Policy

New Proposal For National Health Insurance In Britain

Revolutionary changes in the general medical services of the United Kingdom have been drafted and approved in principle by the British Medical Association, and legislation to implement the recommendations will be introduced at the next session of parliament.

Main principles of the scheme, which contemplates a new nationwide organization would provide for:

1. A system of medical service directed to the achievement of positive health and prevention of disease, no less than to the relief of sickness.

2. The right of every individual to nominate a family doctor of his own choice.

3. Specialists, laboratory service and institutional care made available to all through the family doctor.

4. Co-ordination of all medical service on the lines of a planned health policy.

The proposed scheme, he said, would be operated through a central controlling body for the whole country which would be independent but representative of the medical profession. Local auxiliary bodies would be created in selected centres.

Apart from those entitled to national health insurance, approximately 20,000,000 members of the population would be embraced in the new proposal and qualify for medical services they never enjoyed before.

Letter Saved His Life

Written By Lord Baden Powell To Scout In Hospital

Eric Hall, who was formerly commissioner of Boy Scouts in America, tells of an incident a few years ago when one of his scouts lost a leg in an accident. "He was slowly dying in hospital through sheer lack of interest," he said. "Then Lord Baden Powell, to whom I had written, sent a letter to him. Everything changed. He fought and lived!" This letter is a table of contents in the Scout headquarters at Albany, New York. The sequel is four pages of youthful signatures which was sent by the scout troop to Lord Baden-Powell, wishing him a speedy recovery from his recent illness. His letter to the scout in New York, in the opinion of doctors, and the hospital authorities, was undoubtedly the turning point in the boy's fight for life.

An Unusual Event

Parents Attend Golden Wedding Anniversary Of Their Daughter

Mr. and Mrs. Louis Asselin of Pinewood, near Fort Frances, Ont., were central figures in a family reunion marking the golden wedding anniversary of their daughter, Mrs. Thomas Jolicouer of Noranda. Quebec.

Six generations of the family—almost 50 persons—attended the reunion. Mr. Asselin is past 90 and his wife is 84.

First President to go beyond the legal boundaries of the United States while holding office was Grover Cleveland. He went out past the three-mile limit while fishing in the Atlantic ocean.

HORSES WORK BETTER

When Fred from Goldie-Bell, Ont., Ontario, was working on a horse, he was in the habit of saying "You're a horse, you're a horse, you're a horse."

## LOCALS

Mr. Andrew Armour was a visitor in Irma over the week-end.

Mr. Thos. Marsden has moved his family into the Schonert house.

The Irma public school will open on September 5th for the fall term.

Mr. and Mrs. Allant of Edmonton spent Wednesday at the Arnold home.

Mr. O. P. Larson returned last Saturday from his studies at the University.

Mr. and Mrs. Jas. Pond and daughter spent a few days in Edmonton this week.

A regular meeting of the Irma village council was held on Thursday evening, August 11.

Mr. D. W. Melvor of Edmonton has accepted a position as mechanic at Peterson's garage.

Mr. Geo. Wilbraham arrived in Irma on Friday last for a visit with his son Charles and family.

Mr. Wm. Lawson is enjoying a visit from his mother who arrived here last week from Yorkshire, England.

Mrs. M. Arnold and daughters arrived home on the Flyer on August 10th from a visit at Vancouver and other points.

Mr. H. W. Love was in town August 11 distributing the first of the 1938 Alberta honey crop. It is a very fine sample.

Mr. and Mrs. N. L. Fuder and Mr. and Mrs. M. T. Knudson arrived home Wednesday last from their holiday trip to the U. S. A. A number of students have advised the secretary of their intention of coming to the Irma high school at the opening of the fall term.

Born, to Mr. and Mrs. Clifford Smallwood, in Royal Alexandra hospital, Edmonton, August 10th, a daughter, Sousaine Margaret.

In the junior baseball, play-off games the Irma team won one game with Stettler and lost two. The first game was played in Irma on August 10th and the other two in Stettler on August 12th.

The Irma W.M.S. will have charge of the church services on Sunday, August 21st. Rev. E. Longmire, the pastor, will resume his duties on August 28th at Paschenale, Crescent Hill and Irma at the usual hours.

Special: Style Beauty Parlor, Irma, offering school girls' permanents for \$2.50, between August 29 and September 3rd, inclusive. Free finger-wave two weeks later, with every permanent. Please make appointment. Operator: A. L. Barrett. 19-38

Mrs. E. L. Elford took ill suddenly last Sunday morning and was rushed to Edmonton for treatment. She was brought back to her home on Monday slightly improved but will be confined to her bed and under the care of Dr. Greenberg for some time yet.

The regular monthly meeting of the Alma Mater and Roseberg ladies' aid will be held next Thursday afternoon, Aug. 25, at the home of Mrs. Edith Elliott. The devotionals will be taken by Mrs. B. Oldham and Mrs. Geo. Fisher will have charge of the program. Hostesses are Mrs. McCartney and Mrs. B. Oldham. All neighbors and friends are very cordially invited.

For the first time in over 15 years Mr. Jas. Fenton and his three sisters spent a few days together at the Fenton home this last week. Mrs. J. Armstrong of Vancouver with her daughter, Miss Henel, Mrs. E. Armstrong and daughter, Miss Loris, with Mrs. J. L. Campbell, all of Edmonton, motored from the city last Saturday. The Edmonton folks returned to their home Tuesday afternoon, the rest remaining over for a longer visit.

The last regular meeting of the Irma ladies' aid was held in the church and although the season is a busy one a goodly number of members found time to attend. At this meeting it was definitely decided that our objective for this fall's work would be to finance the mass, a committee of three to work on this being appointed, so any offers of help in the way of work, loads of sand, etc., will be gratefully received. Committee: Mesdames E. Carter, Tripp and Reeds. At the close of the meeting Mrs. Allen and Mrs. Tripp served a delightful lunch and a social half hour was enjoyed.

**Anglican Church Notes**  
**ST. MARY'S (Anglican) CHURCH**  
Rev. P. A. Rickard, Vicar  
Service will be held on Sunday, August 28th, at 2.30 p.m.

The W. A. meeting will be held at the home of Mrs. F. Thurston on Tuesday, August 22, at 2.30 p.m.

**SHARON LUTHERAN CHURCH**  
J. B. Stole, Pastor  
8 p.m., Installation service (English). The new pastor will be installed as pastor for this parish by Dr. Iver Iversen of Saskatoon.

## JARROW JOTTINGS

Jarrow, Aug. 11.—Mr. P. McNabb and family motored to Heister last week, spending two days visiting relatives. They returned on Friday.

Mrs. Gladys Derrick, of Colinga, California, arrived in Jarrow on the flyer Sunday night. She came to attend the funeral of her father, the late Mr. W. Bridgeman, which was held on Monday, August 15.

Rev. and Mrs. Griffith left Tuesday for Edmonton, Sylvan Lake and Banff, where they will spend three weeks holidaying.

The Jarrow Sunday school will reopen on September 4 and the church service will also be held on that date.
